

Business Continuity Management

Consulting services

Stephane Hesschentier - June 2023

Goals

Our innovative method has a clear goal: to prepare your organization to face the most catastrophic scenarios: natural disasters, cyber-attacks, major accidents.

How? By being ready to act in times of crisis, maintaining vital processes even in degraded mode, and swiftly returning to a state of normality.

In our **Business Continuity Plan** (BCP), everything is meticulously designed, organized, and formalized to confront the unimaginable. Gone are the days of outdated terms like "Rescue Plan" or "Emergency Plan" limited to IT professionals. Today, the BCP involves your entire organization, with each department playing a crucial role in business continuity.

Imagine our **Business Continuity Management System** (BCMS) as a cutting-edge factory. It produces standardized and operational plans tailored to your specific needs. Everything is engineered to keep your business moving forward, even in the most challenging times. Just like cars rolling off an assembly line, all your plans follow the same effective model.

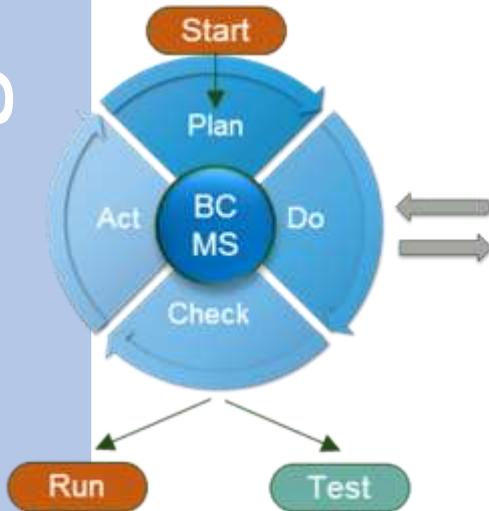

The time has come to evolve your approach. Other management systems, such as the Quality Management System or the Security Management System, have already been successfully implemented.

Don't fall behind. Embrace the innovation of BCMS and ensure the sustainability of your business.

Our method

Business Continuity Management System

Program and Project Management Business Continuity Awareness and training	Phase 1: Needs Assessment	
	<ul style="list-style-type: none"> 1 Business Impact Analysis (BIA) 2 Risk Assessment (RA) 3 Crisis Scenario Definition 4 Functional specifications for Business Continuity 	
	Phase 2: Design of the continuity strategy	
	<ul style="list-style-type: none"> 1 Formalization of the continuity strategy 2 Technical specifications for Business Continuity 3 Drafting of the risk protection and mitigation plan 	
	Phase 3.1: Design of the Business Continuity Plans	Phase 3.2: Build of the technical Continuity Solution
	<ul style="list-style-type: none"> 1 Crisis Management 2 IT Continuity (DRP) 3 Business Continuity 4 Continuity Logistics 	<ul style="list-style-type: none"> 1 Writing of Call for tenders 2 Selection of suppliers 3 Management of tech. projects 4 Integration
	Phase 4: Design of Business Continuity Exercise Plan	
	<ul style="list-style-type: none"> 1 Global / Corporate Level 2 Crisis Management 3 IT and Disaster Recovery 4 Business Continuity 	

Our forward-thinking approach offers a comprehensive and adaptable solution to meet your business continuity needs. Whether you're experienced or just starting out, our method perfectly adapts to your progress, consulting requirements, and budget.

We help you define an effective Business Continuity Management System (BCMS) by combining governance, policies, and efficient procedures. We ensure continuous improvement through the PDCA cycle: Plan, Do, Check, Act.

Our approach is fully compliant with **ISO 22301 standard**.

With us, you'll navigate **5 key steps**: assessing needs, designing customized strategies, writing Business Continuity Plans, implementing technical solutions, and conducting exercises. We conduct in-depth analyses, taking into account your organization's culture, constraints, and specific goals.

We excel in IT, logistics, and business continuity plans. We perform cost-benefit analyses to optimize performance while respecting your budget.

Trust our independent and effective expertise in implementing technical solutions. Our exercise plans progress realistically, considering your resources and budget while validating your plans.

We also provide support in communication, tool implementation, and project management, tailoring our services to your specific needs.

Why us?

Our team consists of highly **experienced** professionals who have successfully carried out relevant missions in various industries, including yours, over the past **30 years**.

We prioritize **innovation** and deliver impeccable quality in our services through our working methods. The resulting efficiency of our approach enables you to control costs throughout the entire lifecycle of your Business Continuity Management System.

Our methodology aligns with applicable standards and **best practices**, providing the flexibility to adapt to your specific scope of action.

We offer **competitive pricing** that is tailored to fit your budget.

We maintain our skills through high level certifications: **DRII, BCI and PECB**.
